QR CODES FOR INSTALLATION AND OPERATING INSTRUCTIONS

How can installation and maintenance be made even more innovative and sustainable?

With the new QR codes for STARCLEAN® installation instructions.

For installation and maintenance, you no longer need installation instructions in multi-page paper form, simply use your smartphone or tablet. We place the QR code visibly on the product so that you can quickly access the installation and operating instruction. The procedure for this is quite simple:

1. Take Smartphone or Tablet
2. Open camera app and point to the QR code
3. A link opens at the top of the screen border
4. Click the link

... and you will have immediate access to the appropriate installation and operating instruction!
