Scraper Heating for Scraper Blades Type 09hm

Belt Cleaner Series 830

Belt Cleaner Series 520

STARCLEAN® Scraper Heating

In order to guarantee a continuous bulk material transport and an excellent belt cleaning even at lowest outside temperatures, the STARCLEAN® Scraper Heating for scraper blades type 09hm is the perfect solution. Here are some information about the Scraper Heating at a glance:

-  The Scraper Heating turns on automatically from an adjustable outside temperature
-  The electric control automatically regulates the heat output of the scraper
-  Suitable for outside temperatures down to - 60°C
-  The Scraper Heating adapts to the existing requirements
