

## Closed around the corner

**NEW**

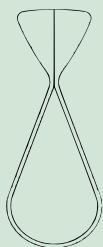

### Closed bulk material transport with the slope conveyor SAFEBELT®

The SAFEBELT® System stands out by a protected bulk material transport, as well as optimal curve capability.

It saves transfer points while providing best possible dust suppression and energy efficiency.

After the well-known and successful version with 800mm belt width we are glad to introduce now the 1400mm version, which is available immediately.
